

# ANGLED CABLE USB-C/LIGHTNING

MXUC-09

OEM0101209

Maxlife MXUC-09 cable is a product that is distinguished not only by its modern design, but above all by its excellent workmanship, which guarantees long-lasting and reliable use.

The cable has a length of 1 meter, which allows you to freely use it anywhere. It has 2 angled connectors that allow more ergonomic connection to devices, which is especially practical when space is limited. The cables have longer-than-standard reinforced connectors, and are durable and resistant to mechanical damage. As a result, the MXUC-09 cable not only provides excellent data transfer quality, but also a longer life than typical cables.

The cable is made of silicone, which is a flexible and pliable material. As a result, the cable can be easily twisted and placed in any position without fear of damage.
