

4G GPS KIDS WATCH

MXKW-350

PINK - OEM0300609

BLUE - OEM0300610

Maxlife smartwatch 4G MXKW-350 provides not only communication between parents and their child but also offers a range of features designed with safety, education, and entertainment in mind. This smartwatch is more than just a tracking device – it’s a tool that helps parents stay in close contact with their child while providing entertainment and security.

The smartwatch comes with numerous useful features for both parents and the child:

Calls and Video Calls: Parents can communicate with their child through voice and video calling features.

Phone Book: An intuitive phone book allows the child to save important contact numbers.

Accurate Location Tracking: The smartwatch enables precise tracking of the child’s location both outdoors and indoors.

Safe Zone: Parents can set a safe area for the child. They will receive automatic notifications if the child leaves this zone.

Route Tracking: The smartwatch records the route the child has taken, allowing parents to monitor their activity.

Pedometer: An integrated pedometer encourages physical activity in the child.

Math Game: The smartwatch offers a mathematical game that enhances logical thinking skills.

Calculator: A useful feature for learning and everyday tasks.

Chat Function: Children can communicate with each other, exchange messages, and connect in a safe, controlled environment.

Gallery: The smartwatch allows for storing photos.

Camera: The child can take photos and save them on the device.

Rewards: A rewards system motivates the child to achieve goals.

Do Not Disturb Mode: During specified hours, such as study time, parents can deactivate distracting features.

SOS Function: In case of emergency, the child can activate the SOS function, sending an emergency notification with the exact location.

Remote Voice Monitoring: Parents can remotely listen to the child’s surroundings.

Remote Camera: The feature allows remote activation of the camera to view the surroundings.

Furthermore, the smartwatch has additional functions such as an alarm clock, sleep monitoring, and the ability to locate it if lost. Smartwatch is compatible with Android 5.0 or newer and iOS 8.0 or newer operating systems. The smartwatch operates for up to 3 days without needing to be charged. The MXKW-350 features a 600 mAh lithium-polymer battery and charging is done with a magnetic cable.
