

ACRYLIC CARBON CASE

The Acrylic Carbon case is a sturdy cover equipped with non-slip edges that facilitate a secure grip and prevent accidental slipping of the device from the hand or holder. Additionally, the back of the case is solid and durable, meaning the phone will be well protected even in the event of a fall.

The camera island is further protected by raised edges around the lenses, guarding them against scratches. The edges around the entire phone are made of TPU with anti-yellowing and anti-slip technology, meaning they not only do not yellow but also provide better grip. The textured surface further reinforces the casing, protecting the phone from damage.

The Acrylic Carbon case is made of high-quality materials, with precise cutouts for ports. It is equipped with metal buttons that allow for the use of all phone functions without any limitations. Furthermore, despite its solid protection, the case does not significantly increase the size of the phone or restrict the use of car mounts.

Thanks to its excellent quality and effective protection, the Acrylic Carbon case is an essential element of phone security.

ATTRIBUTES

- Metallic buttons and camera island
- Edges made of TPU with anti-yellowing and anti-slip technology
 - Back made of TPU + Acrylic
- Phone edges and camera protection
