

# SOLID SILICONE CASE

A Solid Silicon case provides excellent protection for your phone. It is precisely crafted from durable and flexible silicone, ensuring not only effective defense against damage but also prolonged use.

Inside the case, there is microfiber that additionally safeguards the back of the phone from scratches.

With precise cutouts, the case allows easy access to all ports and buttons without the need for removal. Special camera lens cutouts ensure a perfect fit and protection for the camera island, enabling unrestricted use of photographic functions.

The case features a minimalist design, snugly fitting the phone. This design allows users to enjoy complete protection without sacrificing the convenience of device operation.

It is compatible with screen protectors, providing comprehensive protection for both the phone's casing and screen.
